

In order for SEEK to operate, the parents and responsible adults must have a magnetic stripe card to use with a point-of-service device that is installed at the child care facility. The device is often referred to as P-O-S and sometimes called POZZZ.

Parents will swipe the SEEK card through the POS device each day to record their child's attendance at the child care facility of their choice.

The pictures and documents show you how to use the SEEK card and POS machine.
